and style at a reasonable price for a discerning, creative crowd—think young screenwriters and guitarists. To create a space where this selective set would want to spend its time, the Ace team carefully restored a 1912 hotel between downtown and the Pearl District, retaining the historical character while updating the place to create a design they describe as “warm minimalism.” Next, the staff hired a fleet of local artists to leave its mark in the guest rooms, making each one unique and endeavoring to achieve an “elegantly disheveled” look in all of them. Custom-printed Pendleton wool blankets adorn the organic rubber latex beds. Through the lobby, local brewer Stumptown aromatically roasts divine coffee, and Clyde Common, an adjoining restaurant serving local fare, draws crowds late into the night.
